

DEKALB[®] Corn

DKC47-54RIB Brand Blend

DKC47-54RIB Brand Blend is a broadly adpated product from east to west with good agronomics and a very strong disease package. It can provide strong grain yield potential with a nice plant stature for dual purpose capability in silage.

Key Strengths

- Good grain quality and test weight can be strengths
- Has shown good drought tolerance as well as ear flex
- Very well adapted to use for silage

Plant Description

Kernel RowCob Color

16-18 Red

Management Tips

- Well suited for planting at moderate populations
- Strong disease package for heavy disease prone fields
- Late season standability has been strong

GDU (Growing Degree Unit):

nough maturity of one corn product relative to other remains reasonably constant, the actual nber of calendar days from planting to any given nt of plant development varies with temperature length, rate and date of planting, soil fertility and er environmental factors. All GDU values calculated from the time of planting.

Rating Scale:

-2 = Excellent 3-4 = Very Good 5-6 = Good7-8 = Fair

9 = Poor

ngs are approximate and should not be considered plute. Based on Monsanto conducted trials relative to sgrow and DEKALB brand corn.

Diplodia Ear Rot Rating Scale:

AA = Above Average

A = Average

BA = Below Average

Herbicide Class Ratings:

Ratings are based on observations and research using herbicides at and above labeled rates to simulate extreme environmental conditions, misapplication and adverse soil pH or organic content.

A = Acceptable

Either no adverse effects from the corn product/ herbicide combination were noted on any traits or only slight damage could be noted under adverse conditions or herbicide application at higher than label rates.

C = Caution

The corn product/herbicide combination is usually not a problem if sprayed according to label directions, but can result in plant height reduction, stand loss and suspected yield loss under very adverse environmental conditions, high rates, or extreme soil pH levels or organic content. Use drop nozzle spraying for postemergence herbicides or plant in warm soils for incorporated herbicides to avoid interactions.

W = Warning

Not advised - this corn product/herbicide combination should not be used under any circumstances

Monsanto Company is a member of Excellence Through Stewardship® (ETS). Monsanto products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Monsanto's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. This product has been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship[®] is a registered trademark of Biotechnology Industry Organization.

B.t. products may not yet be registered in all states. Check with your Monsanto representative for the registration status in your state.

IMPORTANT IRM INFORMATION: RIB Complete® corn blend products do not require the planting of a structured refuge except in the Cotton-Growing Area where corn earworm is a significant pest. SmartStax® RIB Complete® corn blend is not allowed to be sold for planting in Cotton-Growing Area. See the IRM/Grower Guide for additional information. Always read and follow IRM requirements.

Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions my vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready technology contains genes that confer tolerance to glyphosate, an active ingredient in Roundup® brand agricultural herbicides. Agricultural herbicides containing glyphosate will kill crops that are not tolerant to glyphosate.
