

2024 BW FUSION CORN PROGRAM

MAXX

\$

Product	Application Timing	Rate	Benefits
401 Biocast Max	Spring application with Starter Fert In furrow or Post Application	16 oz 32 oz	Improved nitrogen utilization
Respite	Each Sprayer Pass	4 oz	Helps blocks Ethylene production
Full Sun	V3-V6	64 oz	Stress and plant health
Meltdown	Fall or Spring Application	32 oz	Uniform stand establishment, Nutrient cycling

ADVANCE

Product	Application Timing	Rate	Benefits
401 Biocast Max	Spring application with Starter Fert In furrow or Post Application	16 oz 32 oz	Improved nitrogen utilization
Respite	Each Sprayer Pass	4 oz	Helps blocks Ethylene production
Full Sun	V3-V6	64 oz	Stress and plant health

ESSENTIAL

Product	Application Timing	Rate	Benefits
401 Biocast Max	Spring application with Starter Fert In furrow or Post Application	16 oz 32 oz	Improved nitrogen utilization
Respite	Each Sprayer Pass	4 oz	Helps blocks Ethylene Production

ADDITIONAL

Product	Application Timing	Rate	Benefits
Boron 7%	Broadcast, Side dress, Y-drop, Foliar	16 oz	Transport of sugars throughout the plant
HF 12%	In-Furrow, Foliar	32 oz	Humic Fulvic Acid, Biological Food Source
Humical	Soil Apply	1-2 gal	Food Source, immediately available to the soil and plants
Biosweet	In-Furrow, Foliar	1 Pint	Biological Food Source
Amino	Foliar	16-32 oz	Stress mitigation and 10# of N

2024 BW FUSION SOYBEAN PROGRAM

MAXX

Product	Application Timing	Rate	Benefits
401ST/ Powered Keg	Seed Treatment	-	Improved nitrogen utilization
Respite	Each Sprayer Pass	4 oz	Helps blocks Ethylene production
Pixie Dust Plus	V3	1.8g/gal (Ask Us)	Enhances plant physiology efficiency, initiates hormone production
Meltdown	Fall or Spring Application	32 oz	Uniform stand establishment, Nutrient cycling
Full Sun	V6-R1	64 oz	Plant health & Vigor

ADVANCE

Product	Application Timing	Rate	Benefits
401ST	Seed Treatment	-	Improved nitrogen utilization
Respite	Each Sprayer Pass	4 oz	Helps blocks Ethylene production
Pixie Dust Plus	V3	1.8g/gal (Ask Us)	Enhances plant physiology efficiency, initiates hormone production

ESSENTIAL

Product	Application Timing	Rate	Benefits
401ST	Seed Treatment	-	Improved nitrogen utilization
Respite	Any Time	4 oz	Helps blocks Ethylene Production

ADDITIONAL

Product	Application Timing	Rate	Benefits
Boron 7%	Broadcast, Side dress, Y-drop, Foliar	16 oz	Transport of sugars throughout the plant
HF 12%	In-Furrow, Foliar	1 qt	Humic Fulvic Acid, Biological Food Source
Humical	Soil Apply	1-2 gal	Food Source, immediately available to the soil and plants
Biosweet	In-Furrow, Foliar	1 Pint	Biological Food Source
