				Trial Average	209.5		15.2	\$ 1042		

All yield values are adjusted to 15.0% moisture. Gross revenue is calculated based on selling price of \$5.00 per bushel and drying cost of \$0.04 per point moisture over 15.0% and waxy corn premium of \$0.60 per bushel. Unit of Measure: Yield (bushels per acre), Test Weight (pounds per bushel). Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

Unit of Measure: Yield (bushels per acre). Test Weight (pounds per bushel). Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

All yield values are adjusted to 15.0% moisture. Gross revenue is calculated based on selling price of \$5.00 per bushel and drying cost of \$0.04 per point moisture over 15.0% and waxy corn premium of \$0.60 per bushel. Unit of Measure: Yield (bushels per acre), Test Weight (pounds per bushel). Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

Trial Average				113	221.8		16.0	\$ 1100		

All yield values are adjusted to 15.0% moisture. Gross revenue is calculated based on selling price of \$5.00 per bushel and drying cost of \$0.04 per point moisture over 15.0% and waxx corn premium of \$0.60 per bushel. Unit of Measure: Yield (bushels per acre). Test Weight (pounds per bushel). Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

				Trial Average	211.7		15.3	\$ 1053						

All yield values are adjusted to 15.0% moisture. Gross revenue is calculated based on selling price of \$5.00 per bushel and drying cost of \$0.04 per point moisture over 15.0% and waxy corn premium of \$0.60 per bushel. Unit of Measure: Yield (bushels per acre), Test Weight (pounds per bushel). Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

2023 Corn Individual Trial Report

Cooperator: Eric Ruen
Trial County: Fillmore, Minnesota
Trial Name: US20 J1A CG FTN 879564392939984
Report Created: Nov 17, 2023

Trial Type: Commercial - FTN
Planting Date: Apr 29, 2023
Harvest Date: Oct 11, 2023
Planting Rate: 34,000 Seeds/Acre

Previous Crop: Soybeans
Tillage Type: Conventional
Irrigation: No
Row Width: 30 Inches

				Trial Average	210.9		16.0	\$ 1046		

All yield values are adjusted to 15.0% moisture. Gross revenue is calculated based on selling price of \$5.00 per bushel and drying cost of \$0.04 per point moisture over 15.0% and waxy corn premium of \$0.60 per bushel. Unit of Measure: Yield (bushels per acre). Test Weight (pounds per bushel). Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

				Trial Average	201.5		15.2	\$ 1005		

All yield values are adjusted to 15.0% moisture. Gross revenue is calculated based on selling price of \$5.00 per bushel and drying cost of \$0.04 per point moisture over 15.0% and waxy corn premium of \$0.60 per bushel. Unit of Measure: Yield (bushels per acre), Test Weight (pounds per bushel). Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

				Trial Average	178.2		14.8	\$ 890				

All yield values are adjusted to 15.0% moisture. Gross revenue is calculated based on selling price of \$5.00 per bushel and drying cost of \$0.04 per point moisture over 15.0% and waxy corn premium of \$0.60 per bushel. Unit of Measure: Yield (bushels per acre), Test Weight (pounds per bushel). Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

All yield values are adjusted to 15.0% moisture. Gross revenue is calculated based on selling price of \$5.00 per bushel and drying cost of \$0.04 per point moisture over 15.0% and waxy corn premium of \$0.60 per bushel. Unit of Measure: Yield (bushels per acre), Test Weight (pounds per bushel). Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

2023 Corn Individual Trial Report

Cooperator: Not Available
Trial County: Hancock, Iowa
Trial Name: US20 J3D CG MD 879564393563007
Report Created: Nov 17, 2023

Trial Type: Market Development
Planting Date: Apr 24, 2023
Harvest Date: Sep 19, 2023
Planting Rate: 34,000 Seeds/Acre

Previous Crop: Soybeans
Tillage Type: Conventional
Irrigation: No
Row Width: 30 Inches

All yield values are adjusted to 15.0% moisture. Gross revenue is calculated based on selling price of \$5.00 per bushel and drying cost of \$0.04 per point moisture over 15.0% and waxy corn premium of \$0.60 per bushel. Unit of Measure: Yield (bushels per acre), Test Weight (pounds per bushel). Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

Trial Average				310.0			17.4	\$ 1520		56.7	

All yield values are adjusted to 15.0% moisture. Gross revenue is calculated based on selling price of \$5.00 per bushel and drying cost of \$0.04 per point moisture over 15.0% and waxy corn premium of \$0.60 per bushel. Unit of Measure: Yield (bushels per acre). Test Weight (pounds per bushel). Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

All yield values are adjusted to 15.0% moisture. Gross revenue is calculated based on selling price of \$5.00 per bushel and drying cost of \$0.04 per point moisture over 15.0% and waxy corn premium of \$0.60 per bushel. Unit of Measure: Yield (bushels per acre), Test
 Page 75 of 100

Weight (pounds per bushel). Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

Trial Average				198.8			17.0	\$ 978		56.1	

All yield values are adjusted to 15.0% moisture. Gross revenue is calculated based on selling price of \$5.00 per bushel and drying cost of \$0.04 per point moisture over 15.0% and waxy corn premium of \$0.60 per bushel. Unit of Measure: Yield (bushels per acre), Test Weight (pounds per bushel). Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

				Trial Average	190.4		22.6	\$ 894		54.3

All yield values are adjusted to 15.0% moisture. Gross revenue is calculated based on selling price of \$5.00 per bushel and drying cost of \$0.04 per point moisture over 15.0% and waxy corn premium of \$0.60 per bushel. Unit of Measure: Yield (bushels per acre). Test Weight (pounds per bushel). Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

Trial Average					265.8		18.9	\$ 1287		56.4

All yield values are adjusted to 15.0% moisture. Gross revenue is calculated based on selling price of \$5.00 per bushel and drying cost of \$0.04 per point moisture over 15.0% and waxy corn premium of \$0.60 per bushel. Unit of Measure: Yield (bushels per acre), Test Weight (pounds per bushel). Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. FOR CORN, EACH ACCELERON® SEED APPLIED SOLUTIONS OFFERING is a combination of separate individually registered products containing the active ingredients: **BASIC** plus Poncho®/VOTIVO® Offering for corn: metaxyl, ethaboxam, prothioconazole, fluoxastrobin, clothianidin, Bacillus firmus 1-1582. **ELITE** plus Poncho®/VOTIVO® Offering for corn: metaxyl, ethaboxam, clothianidin, and Bacillus firmus 1-1582; prothioconazole and fluoxastrobin at rates that suppress additional diseases. **BASIC** Offering for corn: metaxyl, prothioconazole, fluoxastrobin, ethaboxam, and clothianidin. **ELITE** Offering for corn: metaxyl, ethaboxam, and clothianidin; and prothioconazole and fluoxastrobin at rates that suppress additional diseases. BioRise® Corn Offering is the on-seed application of BioRise® 360 ST. BioRise® Corn Offering is included seamlessly across offerings on all class of 2017 and newer products.

Not all products are registered in all states and may be subject to use restrictions. The distribution, sale, or use of an unregistered pesticide is a violation of federal and/or state law and is strictly prohibited.

The distribution, sale, or use of an unregistered pesticide is a violation of federal and/or state law and is strictly prohibited. Not all products are approved in all states.

B.1. products may not yet be registered in all states. Check with your seed brand representative for the registration status in your state.

IMPORTANT IRM INFORMATION: RIB Complete® corn blend products do not require the planting of a structured refuge **except** in the Cotton-Growing Area where corn earworm is a significant pest. **See the IRM/Grower Guide for additional information. Always read and follow IRM requirements.**

Performance may vary. from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

Roundup Ready® Technology contains genes that confer tolerance to glyphosate. **Roundup Ready® 2 Technology** contains genes that confer tolerance to glyphosate. **Glyphosate** will kill crops that are not tolerant to glyphosate.

Trial Average						45.8		\$ 596	

All yield values are adjusted to 13.0% moisture. Gross revenue is calculated based on selling price of \$13.00 per bushel and vintage gold premium of \$0.60 per bushel. Unit of Measure: Yield (bushels per acre). Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

Trial Average							60.9	9.9	\$ 792	

All yield values are adjusted to 13.0% moisture. Gross revenue is calculated based on selling price of \$13.00 per bushel and vintage gold premium of \$0.60 per bushel. Unit of Measure: Yield (bushels per acre). Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

Trial Average				72.8			10.8	\$946	

All yield values are adjusted to 13.0% moisture. Gross revenue is calculated based on selling price of \$13.00 per bushel and vintage gold premium of \$0.60 per bushel. Unit of Measure: Yield (bushels per acre). Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

				Trial Average	54.3		9.7	\$ 706	

All yield values are adjusted to 13.0% moisture. Gross revenue is calculated based on selling price of \$13.00 per bushel and visible gold premium of \$0.60 per bushel. Unit of Measure: Yield (bushels per acre). Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

6	ASGROW	AG25XF3	XF	2.5	91.0	1	9.0	\$ 1183	1
				Trial Average	81.3		9.3	\$ 1056	

All yield values are adjusted to 13.0% moisture. Gross revenue is calculated based on selling price of \$13.00 per bushel and vintage gold premium of \$0.60 per bushel. Unit of Measure: Yield (bushels per acre). Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

Asgrow Soybean Legend

VALUE ADDED TRAITS:

Conv = Conventional

RR = Roundup Ready[®] soybeans

RR2X = Roundup Ready 2 Xtend[®]

RRXF = XtendFlex[®]

RR2Y = Roundup Ready 2 Yield[®] soybeans

RR2X = Roundup Ready 2 Xtend[®] soybeans

XF = XtendFlex[®] soybeans

SR = Sulfonyleurea Ready (sulfonyleurea-based herbicide tolerance)

E3 = Enlist E3[®] soybeans

ALWAYS READ AND FOLLOW GRAIN MARKETING AND ALL OTHER STEWARDSHIP PRACTICES

AND PESTICIDE LABEL DIRECTIONS. The transgenic soybean event in the Enlist E3[®] soybeans is jointly developed and owned by Corteva Agriscience and M.S. Technologies, L.L.C. [®]™ Enlist, Enlist E3, the Enlist E3 log and Colex-D are trademarks Corteva Agriscience and its affiliate companies. **ALLOY™ IS A TRADEMARK OF M.S. TECHNOLOGIES, L.L.C., WEST POINT, IA. Product**

Use Statement: Enlist E3[®] soybeans contain the Enlist E3 trait that provides crop safety for use of labeled over-the-top applications of glyphosate, glufosinate and 2,4-D herbicides featuring Colex-D[®] technology when applied according to label directions. Following burndown, the only 2,4-D containing herbicide products that may be used with Enlist[®] crops are products that feature Colex-D technology and are expressly labeled for use on Enlist crops. 2,4-D products that do not contain Colex-D technology are not authorized for use in conjunction with Enlist E3 soybeans. **Warning:** Enlist E3 soybeans are tolerant of over-the-top applications of glyphosate, glufosinate, and 2,4-D. Accidental application of incompatible herbicides to this variety could result in total crop loss. When using 2,4-D herbicides, grower agrees to only use 2,4-D products that contain Colex-D technology authorized for use in conjunction with Enlist E3 soybeans. Always read and follow herbicide label directions prior to use.

YOU MUST SIGN A TECHNOLOGY AGREEMENT, READ THE PRODUCT USE GUIDE PRIOR TO PLANTING AND FOLLOW HERBICIDE RESISTANCE MANAGEMENT (HRM) REQUIREMENTS.

The transgenic soybean event in the Enlist E3[®] soybeans is jointly developed and owned by Corteva Agriscience and M.S. Technologies, L.L.C. [®]™ Enlist, Enlist E3, the Enlist E3 log and Colex-D are trademarks Corteva Agriscience and its affiliate companies.

Bayer is a member of Excellence Through Stewardship[®] (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship[®] is a registered trademark of Excellence Through Stewardship.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. It is a violation of federal and state law to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba or glyphosate are approved for in-crop use with Roundup Ready 2 Xtend[®] soybeans. NOT ALL formulations of dicamba, glyphosate or glufosinate are approved for in-crop use with products with XtendFlex[®] Technology. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with products with XtendFlex[®] Technology.

FOR SOYBEANS SEED TREATMENT PRODUCTS APPLIED DOWNSTREAM, EACH ACCELERON[®] SEED APPLIED SOLUTIONS OFFERING is a combination of separate individually registered products containing the active ingredients: **BASIC** Offering: metolaxyl, penflufen and prothioconazole. **STANDARD** Offering: metolaxyl, penflufen, prothioconazole and imidacloprid. **FOR UPSTREAM TREATED SOYBEANS, EACH ACCELERON[®] SEED APPLIED SOLUTIONS OFFERING** is a combination of separate individually registered products containing the active ingredients: **BASIC** Offering: metolaxyl, flupyroxad, and pyraclostrobin. **STANDARD** Offering: metolaxyl, flupyroxad, pyraclostrobin and imidacloprid.

Please review each seed tag to determine active ingredients in the product offering on the seed.

The distribution, sale, or use of an unregistered pesticide is a violation of federal and/or state law and is strictly prohibited. Not all products are approved in all states.

Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

Roundup Ready[®] Technology contains genes that confer tolerance to glyphosate. **Roundup Ready[®] 2**

Technology contains genes that confer tolerance to glyphosate. **Roundup Ready 2 Xtend[®] soybeans contain genes that confer tolerance to glyphosate and dicamba. Products with XtendFlex[®] Technology contains genes that confer tolerance to glyphosate, glufosinate and dicamba. Glyphosate will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Glufosinate will kill crops that are not tolerant to glufosinate.** Contact your seed brand dealer or refer to the Bayer Technology Use Guide for recommended weed control programs.

Contact your Bayer retailer, refer to the Bayer Technology Use Guide, or call the technical support line at 1-844-RRXTEND for recommended Roundup Ready[®] Xtend Crop System weed control programs.
